

# RE:SET

**Future Focused  
Leadership Program**

# **Future Focused Leadership**

From a leadership perspective these are extremely interesting times. The impact, urgency of change and the abrupt shift in the environment teams or organizations had to perform in in 2020 were challenging for every leader. And we are not there yet, we will have to stay nimble during the uncertain of the months to come.

Those who take the time to observe and reflect on the recent past and present will discover leadership lessons for life. That's why we are launching the 2nd edition of the RE:SET Leadership Program.

The RE:SET program of 3pd and Minkowski helps business leaders and their organisations to shift emotionally and mentally to the new reality. In the program we reflect on the past year, reset to the present and develop a new perspective and course of action for the future.

*The future is impossible to predict, but we can be sure it will be different from the world we knew before.*

## **Key Benefits**

**Integrate leadership insights**

**Align with the new reality**

**See possibilities for the future**

**Develop a course for action**

### **How we help you**

The program provides you with a structure, inspiration and support group to develop your leadership abilities and work on your personal and professional reset. Most of the work you will be doing in this program is individual, but you will also be part of a cohort of a maximum of 8 participants. The participants are peers in similar positions. Learning from each other's experiences forms an integral part of the program.

# **Your Journey**

This leadership program consists of four modules. Each module starts with a specific assignment and is concluded by an online meeting of 2 hours.

## **Module 1. Leadership lessons from the recent past**

In the first week we will focus our attention on the past year to allow you to reflect on what happened in your personal and professional lives and the way you led your team or organization during this time. The objective is to capture the most important lessons and insights of this past period, so we can thereafter clear our minds for the present situation and the future.

## **Module 2. Reset to the Present**

In the second week we will reflect on the present 'as the new starting point' of your team and/or organization. We will help you to address choices or dilemma's you are facing in adapting your business to the current and future reality. Your peers will help you in this step to develop actionable insights.

## **Module 3. Anticipating the Future**

In the third week we will take a leap into the future to explore what is possible for your organization and to identify what that means for your leadership. We will use proven methodology for future scanning and leadership development. You develop a strategic and personal plan based on the 'new normal' for your business.

## **Module 4. Operating the Now**

Finally, we will help you to prepare for the now: what needs to be done today to activate the future you have explored? How can your peers in this cohort support you and what is the best system for resilience for everyone?

# Outline
